Clear Choices Clean Water
November 2026

*The pledge for the month of November is **Adopt a Storm Drain!***

Fall is the season when our storm drains get clogged with falling leaves! Most of the time, storm drains are maintained by the people who live near them. If you have drainage issues, you can always contact your city or local municipality to report your concerns. In the meantime, you can clean up visible debris and leaves while you do lawn maintenance.
