

**January 13, 2026 – Superintendent's Report**

**ADMIN UPDATE:**

The Utilities are seeking approval of Amendment No. 2 to Task Order No. 2 with American Structurepoint for the Lawrence 71<sup>st</sup> Street Lift Station Basin I/I Removal Project for not to exceed \$131,650.00 for Post Project Flow Monitoring and Hydraulic Model Recalibration. This area is included in the Administrative Order on Consent issued to the City of Lawrence by the EPA and is included in the EPA approved Sanitary Sewer Overflow Corrective Action Plan that was submitted. This will allow us to measure the amount of I/I removed from our system as part of this project. This monitoring will be done during the months of February, March, & April of 2026.

The 2026 Water and Sewer Utility Budgets are still under review and as soon as those are completed, they will be presented by Baker Tilly to the Board for your review.

**Account Adjustments: None**
